Wildcrafted Sea Buckthorn Juice Powder is derived from the berries, which are orange-yellow in colour and grows mainly within Inner Mongolia. They are small in size, oval or rounded in clusters, handpicked in December through to January, while they are still frozen attached to their twig. The taste is both sweet and sour, mainly due to the Vitamin C content and they also contain Vitamin A along with trace elements. The Wildcrafted Sea Buckthorn is ideal for Vitamin C and Immune beverage formulas.
